No. 43-6/2011-NWO I-CFA-MSE(G)   Dated 25st October 2011.
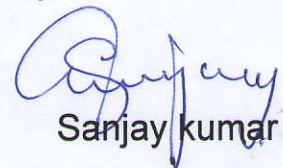

To,

   The CGMs

   All the Telecom Circles/Metro Districts.

Sub: Installation of new updated "RAISE" software for Connecting Tel. exchanges to Central server.

Kindly refer to the issue of implementation of "RAISE" in wireline network. It has been observed that many SSAs have not installed the latest 6.0 version of "RAISE" software. In this regard, it is intimated that older version of "RAISE" software is not having the capability to upload alarm data to central server at Bangalore. Hence, the latest version of software is required to be installed to have connection with the Central Server. Those exchange in charges who have installed the older version need to update the software to latest version 6.0.

Looking to the above, the exchange in charges are requested to immediately download the recently updated version of "RAISE" from the website raise.bsnl.co.in, such that these exchanges are connected to the central server, enabling monitoring through website.

This above exercise may be completed by 27.10.11 positively.
